ATO® FHA SERIES
32V IN-LINE BLADE FUSE HOLDER

0FHA0001XP

0FHA0002XP

Specifications

Max Current Rating:	20A, 30A
Fuse Type:	ATO®, ATO® Smart Glow
Flammability Rating:	UL 94 V-0
Input Terminals:	ATO® or ATO® Smart Glow FUSE BLADES
Mounting Method:	IN LINE FUSE HOLDER
Max Voltage Rating:	32 VDC
Wire Description:	1015 Red Color wires (0FHA0001HXGLO,0FHA0001XPGLO)
Wire Size:	12 AWG (0FHA0001HXGLO,0FHA0001XPGLO)

Description

The ATO® FHA Series 32V In-Line Blade Fuse Holder enables versatile automotive fusing thanks to wire leads that ensure simple in-line installation. The standard version is compatible with ATO® blade fuses up to 20 amps, while the heavy-duty version accepts ATO® blade fuses up to 30 amps. A heat-resistant body and tin-plated copper alloy contacts provide durability for use in automotive environments.

Smart Glow versions of the ATO® FHA Series blade fuse holder feature a natural-colored PVC housing so you can see when an installed Smart Glow fuse is blown. The Smart Glow versions also feature UL 1015 wire leads.

Applications

- Accessory Lighting (Standard-Duty)
- Panel Displays/Electronics (Standard-Duty)
- Air Conditioners / Blower Motors (Heavy-Duty)

Features and Benefits

- Accepts ATO® blade fuses (sold separately unless indicated) up to 20 amps (standard) or up to 30 amps (heavy-duty)
- Heat-resistant thermoplastic fuse holder body
- Two GXL wire leads (standard and heavy-duty), green GPT leads, or UL 1015 wire leads (Smart Glow) enable simple in-line fuse installation
- Tin-plated copper alloy contacts for corrosion resistance
