## WIRE CONNECTOR LUG ASSEMBLY

600 V

### Description

Wire connector lug assemblies offer a safe, convenient way of splicing cables, providing a fixed junction tap-off point or splitting primary power into secondary circuits.

### Applications

- HVAC/R
- Elevator systems
- Material handling equipment
- Control panels
- Motor controls
- Switchgear
- Applications where power needs to be distributed to more than one load

### Specifications

<b>Voltage Range</b>	600 V
<b>Current Rating</b>	Based on NEC Table 310.16, using 75 °C copper wire
<b>Connector</b>	Aluminum: highly conductive aluminum, tin plated
<b>Approvals</b>	cULus listed (File: E502265)
<b>Environmental</b>	RoHS Compliant
<b>Country of Origin</b>	China

### Connectors

Box lug connectors are designed for use with a single or multiple, solid or class B or C stranded conductor. For UL approved use of more than one conductor per connector opening, contact Littelfuse Technical Service. Manufacturers of cable terminations can furnish crimp-on sleeves for fine stranded conductors which permit these conductors to be used with box lugs.

### Ampere Ratings

The wire connector lug assembly ampere rating is based on the line ampacity of 75 °C insulated conductors per NEC\* Table 310.16. If 60 °C insulated conductors are used, load must not exceed the ampacity of 60 °C conductors. Use of conductors rated in excess of 75 °C is permitted (for example 90 °C), however, load must not exceed the ampacity of 75 °C conductors.
