## **Description**

The 468 Series Slo-Blo® Surface Mount Fuse (SMF) is a small (1206 size) thin-film device designed for secondary protection of circuits used in space constrained applications such as hand-held portable electronic devices.

This series is 100% lead-free and meets the requirements of the RoHS directive. Halogen-Free 468 Series fuses are available-to order use the "HF" suffix. See Part Numbering section for additional information.

## **Features and Benefits**

- Complies with electronic industry environmental standards for lead reduction.
- Product is compatible with lead-free solders and higher temperature profiles.
- Time delay feature withstands high inrush currents and prevents nuisance openings.

#### Package is visually distinct from fast-acting version for easy identification.

- Top side marking allows visual verification of amperage rating.
- Lead-free, halogen-free and ROHS compliant.

## **Applications**

Secondary protection for space constrained applications:

- Cell phones
- Battery packs
- Digital cameras
- DVD players Hard disk drives.

## **Temperature Re-rating Curve**

#### Note:

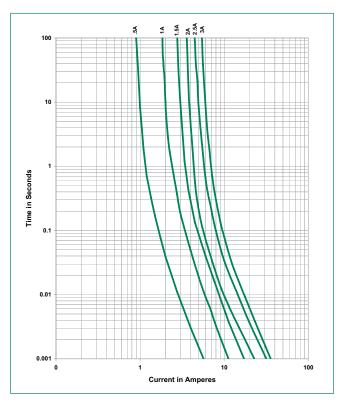

1. Rerating depicted in this curve is in addition to the standard derating of 25% for continuous operation.

#### Example:

For continuous operation at 70 degrees celsius, the fuse should be derated as follows: I = (0.75)(0.80)I\_{\_{RAT}} = (0.60)I\_{\_{RAT}}

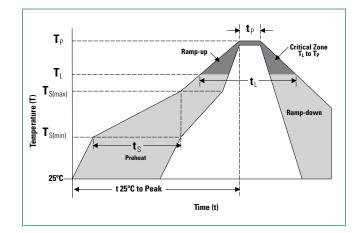

2. The temperature derating curve represents the nominal conditions. For questions about temperature derating curve, please consult Littelfuse technical support for assistance.
