05931300 SERIES

30V 10A ADR TIME DELAY RELAY WITH 24V COIL

05931400

Description

This 30V 10A ADR Time Delay Relay with 24V Coil is an off-delay timer that is designed to delay the opening of the ADR battery switch installed on vehicles approved for EURO 4, EURO 5, and later.

All industrial vehicles produced from 2006+, in order to comply with the pollution regulations, are equipped with the SCR (Selective Catalytic Reduction) system for reducing emissions in exhaust gases using a urea chemical agent. This system requires a cleaning cycle of variable life depending on the vehicle after the engine has been switched off. It is therefore necessary to supply power to the electrical system for about 3 minutes after the vehicle is stopped by installing an off-delay timer relay that delays the isolation of the batteries.

Specifications

Max Voltage Rating: 30V
Max Continuous Current Rating: 10A

Operating Temp Range: $-40^{\circ}\text{C} / +80^{\circ}\text{C}$

Ingress Protection:IP5K4Coil Voltage:24VCircuitry:SPDTHousing:PA66

Applications

• ADR Trucks Approved for EURO 4, EURO 5, and Later

Features and Benefits

- Time delay relay designed to delay the opening of the ADR battery switch installed on vehicles approved for EURO 4, EURO 5, and later
- 3-minute time delay
- 24V coil rating
