

DPF120C600HB

600 V, 2 x 60 A High Performance Fast Recovery Diode

RoHS

Description:

This 600 V, 2 x 60 A general purpose, power switching diode utilizes a diode array with common cathode configuration assembled in a TO-247 package.

This device belongs to the HiPerFRED (High-Performance Fast Recovery Diode) series that features planar passivated chips, very low leakage current, and very short recovery time. These features make the HiPerFRED series suitable for high-frequency applications such as battery chargers, PFC, and high-frequency output rectifiers.

Littelfuse power switching diodes can be integrated with other power semiconductors to provide complete power solutions for a wide range of applications.

Features:

- Planar passivated chips
- Very low leakage current
- Very short recovery time
- Improved thermal behavior
- Very low I_{RM} values
- Very soft recovery behavior
- Avalanche voltage rated for reliable operation
- Soft reverse recovery for low EMI/RFI
- Epoxy meets UL 94V-0
- Low I_{RM} reduces:
 - Power dissipation within the diode
 - Turn-on loss in the commutating switch

Applications:

- Antiparallel diode for high frequency switching devices
- Anti-saturation diode
- Snubber diode
- Free wheeling diode
- Rectifiers in Switch Mode Power Supplies (SMPS)
- Uninterruptable Power Supplies (UPS)
