

Protection Relays & Controls

NGR SERIES – US

Neutral Grounding Resistor System

Description

High-resistance grounding prevents many of the problems that are associated with ungrounded and solidly grounded electrical distribution and utilization systems. High-resistance grounding can limit point-of-fault damage, eliminate transient overvoltages, reduce the arc-flash hazards, limit voltage exposure to personnel, and provide adequate tripping levels for selective current-based ground-fault detection and coordination.

The Littelfuse Neutral Grounding Resistor System is a neutral grounding resistor (NGR), current transformer, and sensing resistor installed in a NEMA 3R enclosure used to high-resistance ground transformers and generators. The NGR system is designed for use with Littelfuse Neutral Grounding Resistor Monitors for complete system grounding and grounding protection.

The NGR series – US systems are designed for use in US applications and all other parts of the world, not including Canada. For applications in Canada, please use the NGR series – Canada.

Applications

High-resistance grounding is applied on transformers and generators where safety and continuity of service are important. A faulted feeder may remain in operation until it is safe to repair the fault, where allowed by the local electrical code.

Features

Enclosure

The NGR Series – US comes pre-installed in a ventilated NEMA 3R galvanized steel enclosure and components are pre-wired to terminals for ease of installation. Back view shown on left.

ER Series Sensing Resistor

Use with the SE-325 or the SE-330 to continuously monitor the continuity of a neutral-grounding resistor and eliminate hazardous voltage levels at the relay.

- ER-600VC is designed for use on systems up to 600 V for indoor applications. Available in optional moisture-proof enclosure (shown on left) for outdoor applications.

- ER-5KV for use on systems up to 4160 V for indoor applications.

- ER-5WP is designed for use on systems up to 4160 V and comes with weather-protected terminals for outdoor installations.

Earth-Fault Current Transformer

Used with the SE-325 or the SE-330 to measure ac current flowing through the NGR for use with the continuity monitoring circuit and to detect ground faults.

- ELCT5-31 used with SE-330 for 5 A and 10 A NGRs.

- SE-CS10-2.5 used with SE-330 for 10 A and 15 A NGRs.

- CT200 used with the SE-325 for all applications.

- 5SHT-101-E (not shown) used with SE-330 for 25 A NGRs.

Benefits

- Eliminate phase-to-ground arc-flash incidents
- Eliminate transient overvoltages
- Reduce point-of-fault damage
- Can provide continuity of service during a ground fault
- Includes current transformer and ER series sensing resistor for use with Littelfuse monitoring relay and for ease of installation.

Simplified Circuit Diagram with Littelfuse Neutral-Grounding-Resistor Monitor

Note 1: Use minimum #8 AWG white or grey conductor insulated to system voltage to connect NGR to neutral.

Note 2: Use conductor insulated to system voltage (#14 AWG is typically used) and a separate lug at the X0 point to connect ER Series Sensing Resistor to neutral.

Note 3: Locate NGR system near transformer or generator.

Note 4: Two-conductor twisted cable required, shielded recommended.

Note 5: Voltage between ER Series Sensing Resistor terminals R and G is limited to 100 V by internal clamp.

Note 6: Use minimum #8 AWG green or bare conductor to connect NGR to ground.

Protection Relays & Controls

NGR SERIES – US

Specifications: 480 V NGR Systems

Voltage	480 V line-to-line, 277 V line-to-neutral
Let-Through Current	2 A or 5 A
Resistance	138.5 Ω (2 A) or 55.4 Ω (5 A)
Tolerance	+/- 10 % resistance
Duty Cycle	Continuous rated
Current Transformer	ELCT5-31: For use with SE-330 NGR Monitor Turns Ratio: 100:1 Current Rating: 5:0.05 A Primary Rating with SE-330: 5 A when connected to terminals 8 and 11 GF Trip Range: 100 mA to 5 A Window Diameter: 31 mm (1.22") CT200: For use with SE-325 NGR Monitor Turns Ratio: 200:5 Current Rating: 200:5 A GF Trip Range: 0.5, 2.0, 4.0 A Window Diameter: 56 mm (2.2")
Sensing Resistor	ER-600VC; Optional installation in NEMA 4 enclosure for outdoor applications
Insulation Level	11 KV BIL
Temperature Rise	385 °C (725 °F)
Resistor Type	Stainless steel wire wound
Dimensions	Refer to dimensions drawings
Weight	23 kg (50 lbs)
Altitude	0–2000 masl
Enclosure Style	NEMA 3R, galvanized steel
Finish	Powder coated
Color	ANSI 61 grey
Mounting	Floor mount
Siesmic Bracing	Included
Approvals	cULus or CSA at customer request
Warranty	12 months in service or 18 months from the date of shipment whichever occurs first

Specifications: 600 V NGR Systems

Voltage	600 V line-to-line, 347 V line-to-neutral
Let-Through Current	2 A or 5 A
Resistance	174 Ω (2 A) or 69 Ω (5 A)
Tolerance	+/- 10 % resistance
Duty Cycle	Continuous rated
Frequency	50–60 Hz
Current Transformer	ELCT5-31: For use with SE-330 NGR Monitor Turns Ratio: 100:1 Current Rating: 5:0.05 A Primary Rating with SE-330: 5 A when connected to terminals 8 and 11 GF Trip Range: 100 mA to 5 A Window Diameter: 31 mm (1.22") CT200: For use with SE-325 NGR Monitor Turns Ratio: 200:5 Current Rating: 200:5 A GF Trip Range: 0.5, 2.0, 4.0 A Window Diameter: 56 mm (2.2")
Sensing Resistor	ER-600VC; Optional installation in NEMA 4 enclosure for outdoor applications
Insulation Level	11 KV BIL
Temperature Rise	385 °C (725 °F)
Resistor Type	Stainless steel wire wound
Dimensions	Refer to dimensions drawings
Weight	23 kg (50 lbs)
Altitude	0–2000 masl

Accessories

SE-325 Neutral Grounding Resistor Monitor

Basic ground-fault and neutral-grounding resistor monitoring relay that measures neutral current, neutral-to-ground voltage, and neutral-to-ground continuity.

SE-330 Neutral Grounding Resistor Monitor

Advanced ground-fault and neutral-grounding resistor monitoring relay that measures neutral current, neutral-to-ground voltage, and neutral-to-ground resistance.

NGRM-ENC Enclosed Neutral Grounding Resistor (NGR) Monitor

Type 4X enclosure housing a Littelfuse Startco SE-325 or SE-330 Neutral Grounding Resistor Monitor and optional accessories that include a 480/600 V control power transformer (CPT), faulted-phase indication (FPI; implemented with an EL3100 Ground-Fault & Phase-Voltage Indicator), earth-leakage panel meter, pulse-enable control, and mounting options. Appropriate fusing is included and field wiring is to terminal blocks.

Custom NGR Systems

Additional custom NGR systems are also available from Littelfuse. For NGR systems not listed on this sheet please contact Littelfuse by emailing NGRquotes@Littelfuse.com
